

Are **Internal Controls** overwhelming your school's administration?

Is your school overwhelmed due to **lack of resources and time constraints**?

Does your school have policies and procedures in place to meet **mounting regulatory requirements**?

For example, do you have Pandemic Flu, FERPA, and NCLB related policies and procedures developed, updated and implemented so every individual knows what, how, why and when and can make informed decisions?

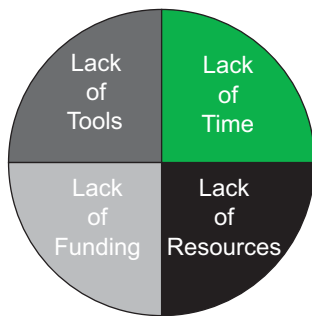

Does your school have policies and procedures in place to **ensure legal due diligence and prevent lawsuits**?

For example, do you have Acceptable & Unacceptable Usage policies as well as Information Privacy, Employment and Business Continuity policies and procedures developed, updated and implemented?

Are your school's agreements up-to-date for **Board Members, Contractors, Vendors, Service Providers and other entities**?

Educational institutions risk losing thousands and thousands of dollars if they lack policies and procedures that can help prevent data breaches, lawsuits, fines and many other expensive and embarrassing incidents.

Top Reasons Policies are Not Developed or Updated

School Administrators have an obligation to faculty, staff, students and parents to ensure safety and preparedness, which is accomplished with awareness and accountability, and required by law to implement and manage Internal Controls to ensure success, profitability and survivability...and without tools like Intelligent Templates, schools will struggle to keep up with outdated and reactive efforts."

- Rick Shaw, CEO Awareity

Awareity can help schools to target these top reasons and much more.

Awareity's Intelligent Templates offer several clear advantages over conventional "generic templates":

- Easier to customize for your school's specific culture
- Accessible 24/7 from anywhere Internet access is available
- Empowers your school's existing personnel to develop plans, policies and procedures
- Flexible and allows for school-specific roles and responsibilities
- Very user friendly and simple to use
- Less time consuming due to built in "intelligence" within the templates

Awareity will soon offer an **Emergency Response and Crisis Management template package for schools and will include input from multiple plans and reports including:**

- Virginia Tech Recommendations
- Secret Service Safe Schools Initiative
- VCCS Emergency Preparedness Guidelines
- Department of Education - Crisis Management Guidelines

Other Intelligent Template packages coming soon:

- Pandemic Flu
- OK, Then What?

Awareity is leading the way with Intelligent Templates so your school can meet obligations to staff and students and Federal and State Examiners with policies and procedures developed according to specific requirements, guidelines and recommendations. Utilizing Awareity's revolutionary Intelligent Templates and industry leading MOAT [Managed Ongoing Awareness and Trust], schools will be able to develop, securely communicate, implement, manage and coordinate Internal Controls (situational awareness, policies, procedures, plans, lessons learned, etc.) to all appropriate personnel with easy access. School Administrators especially like Awareity's tools and services because no hardware and no software is needed so their schools can begin saving time, money and resources immediately...but only if you contact Awareity today.
